ABSTRACT

This fact book for Mt. San Jacinto College (MSJC) (California) contains institutional and student information presented in charts, graphs, and tables. It is designed to serve as a general reference for the MSJC community. Report highlights include: (1) MSJC has two campuses and more than 30 additional sites, through which it will ultimately provide for 15,000 to 20,000 students; (2) between 1996 and 2000 there was a 54% increase in MSJC's student population, from 7,082 to 10,932; (3) in 1996, 64% of students were white (non-Hispanic), compared with 58% in 2000; (4) Hispanics make up 19% of the district population, but they represent almost 25% of MSJC's student population; (5) 63% of enrolled students are female, compared with 56% females enrolled in community colleges statewide; (6) while the percentage of students under the age of 30 has remained relatively stable, the percentage of students over 50 increased from 6% to 9% between 1996 and 2000--this is the second fastest-growing segment of the student population after Hispanics; (7) approximately 60% of students attend classes during the day, which is less than the statewide rate of 67%; and (8) there are 95 full-time and 358 part-time faculty members. The MSJC Factbook contains data presented in charts, graphs, and tables. Designed to serve as a general reference for the MSJC community, it is intentionally kept short – containing basic data regarding the College and its students. The data have been compiled from various resources and, wherever possible, give an evolutionary picture of the college over a five-year span. Information in the College Overview was pulled from the MSJC catalog as well as resources provided by the President's Office and Public Information Office. Student Enrollment information is based on data provided by the Enrollment Management Office, the California Community Colleges Chancellor's Office MIS data warehouse, as well as data contained in our own Datatel/Colleague database. The California Community Colleges Chancellor's Office MIS data warehouse has served as the primary source for Student Characteristics. Personnel information was provided by the Human Resources Office. And the Budget section comes from materials developed by the wonderful people in Business Services. A special note of appreciation to Bernadette Furr for her creation of the graphs and charts. To all who have assisted in gathering this large amount of information, especially the folks in Information Services – THANKS!!!

Updated annually in August, the Factbook may also be found on the MSJC Research Office's website [<http://www.msjc.cc.ca.us/research/index.htm>]. Also located at that website will be a compendium (as of late Fall 2001). This compendium will include information from the 2000 census, as well as information related to the communities MSJC serves.

—APPROVED BY THE MT. SAN JACINTO COLLEGE BOARD OF TRUSTEES ON OCTOBER 12, 2000

A Brief History

The Mt. San Jacinto Community College District was formed in 1962 by a vote of the citizens in Banning, Beaumont, Hemet and San Jacinto.

The College enrolled its first students in the fall of 1963 and held classes in rented facilities. The San Jacinto campus, which opened in 1965 with two buildings, has grown into a comprehensive college campus serving the needs of students and the community. In 1975, the residents of Temecula, Lake Elsinore, Perris and adjacent areas voted to join the Mt. San Jacinto Community College District, increasing the college's area to the present 1,700 square miles. Although the boundaries have remained stable since 1975, the District has changed dramatically, especially since the 1980's. In recent years, unprecedented population growth has fostered the highest rate of enrollment increase of all 108 community colleges.

In response to this intensive growth, Mt. San Jacinto College (MSJC) opened its Menifee Valley campus in October 1990. By the end of its first year, the Menifee Valley campus had enrolled 2,100 in classes. As of Fall 2001, MSJC is offering courses at its two campuses and more than 30 additional sites throughout the district.

With the rapid growth in enrollments being experienced at both campuses, the District has engaged in extensive planning and development to ensure state-of-the-art learning environments for MSJC students. In the fall of 1993, the Alice P. Cutting Business & Technology Center opened to students with new laboratories for business, computer information science, engineering technologies, electronics and photography. In the fall of 1995, a state-of-the-art music building opened on the San Jacinto Campus. In 2001, major renovations occurred – a new print shop, bookstore, expansion of office space, and the remodel of the cafeteria. Construction was started for a larger childcare center and early childhood development lab.

The master plan for the Menifee Valley campus will ultimately provide for 15,000 to 20,000 students. Construction plans also call for the first phase of a new library facility on this campus. A vast increase in classroom space on the Menifee Valley campus occurred in 1995-1996 with the opening of the Allied Health and Fine Arts buildings. In 2000, the campus acquired eight new classrooms and in the spring of 2001, ground was broken for a childcare center.

As part of a single college, multi-campus district, MSJC faculty and staff from both campuses work together to provide the highest quality curriculum and student services possible. The Board of Trustees, the Superintendent/President, faculty, and staff have made the commitment to provide excellent transfer and occupational education programs and services in a supportive teaching and learning environment. As the College continues to grow in the years ahead, the tradition of building for the future, which began in 1963, will continue to guide Mt. San Jacinto College in its quest for excellence during the 21st century.

HOW WE ARE GOVERNED

The College District

The Mt. San Jacinto Community College District is comprised of eight unified and high school districts: Banning Unified School District, Beaumont Unified School District, Elsinore Unified School District, Hemet Unified School District, Murrieta Valley Unified School District, San Jacinto Unified School District, Perris Union High School District, and Temecula Valley Unified School District. Administrative offices are located in San Jacinto, California.

The College

Mt. San Jacinto College is a single college with campuses in San Jacinto and Meniffee. Classes are also offered at locations throughout the District, including Temecula, Banning, and Elsinore.

Educationally, the District has five major functions:

1. To serve those students who wish to transfer to a university of four-year college.
2. To provide occupational education opportunities for those students who desire training for employment.
3. To provide general education on a collegiate level and transitional education at a pre-collegiate level for students who wish to enrich their personal lives and to be of greater service to their family, community and nations.
4. To provide cultural, educational, and recreational services to members of the community.
5. To provide student services including guidance, counseling, placement, and testing to students and prospective students.

Governance by the Board of Trustees

- A. Under the provisions of the California Education Code, the Board of Trustees is elected by the voters of the Mt. San Jacinto Community College District.
- B. The Superintendent of the District serves as the Secretary to the Board, Authorized Agent of the Board, and President of the College.
- C. Five members comprise the Board of Trustees. The District is divided into five trustee areas. A trustee must reside in and be registered to vote in the area he/she represents, and is elected by the registered voters within his/her trustee area.

Disabled Students Profile

Mt. San Jacinto College provides equal opportunities and access to students with physical, visual, hearing, psychological or learning disabilities, acquired brain injuries and developmentally delayed learners, who pursue course work at the college. Disabled Students Program (D.S.P.) assists disabled students in gaining maximum access to college curriculum and programs while attaining their academic, vocational and personal goals.

Who is Eligible?

To be considered for eligibility in E.O.P.S. program, a student MUST:

1. Be a resident of California.
2. Be enrolled full-time (12 units) when accepted by the EOPS program.
3. Qualify to receive a Board of Governor's Grant A or B.
4. Be educationally disadvantaged as determined by the EOPS program.
5. Not have completed more than 70 units (or 6 consecutive semesters) of college level course-work.

The following are special services that may be offered to qualified students: Priority registration and assistance, referrals, assessment career planning, personal/vocational/academic counseling, peer advising, tutoring and financial assistance.

Cooperative Agencies Resources for Education (C.A.R.E.)

Cooperative Agencies Resources for Education (C.A.R.E.) is a service provided through Extended Opportunity Program and Services (E.O.P.S.) to assist single parents receiving Temporary Assistance for Needy Families (T.A.N.F.) to increase their educational skills, become more confident and self sufficient, enhance their employability and move from welfare to independence. C.A.R.E. Functions in cooperation with the Department of Public Social Services, Employment Development Department, and Mt. San Jacinto College. CARE students are eligible for E.O.P.S. services plus special self-esteem counseling sessions, assistance with childcare and a number of other support services.

COMMUNITY EDUCATION

Mt. San Jacinto College's Community Education program provides two types of offerings: Non-credit adult education courses, as well as community service classes and activities.

The primary component of the Community Education Program is non-credit adult education. One objective of adult education in California is to provide citizens of every age and educational level continuing opportunities for lifelong learning. Non-credit courses help to meet this objective by offering subjects approved and funded by the state. Because of the state's financial support, students do not pay a fee to take non-credit courses. English as a Second Language, GED preparation, high school diploma, and classes specially designed for senior adults are some of the courses offered through the non-credit program.

MSJC's community service classes provide opportunities for personal and professional development, skill improvement and upgrading, cultural enrichment and recreational enjoyment and learning. These classes are supported solely by registration fees. The program is not funded by taxpayers' dollars.

College credit is not given for non-credit or community service classes. However, non-credit students do accrue FTES funding at a lower rate than credit students for the College.

Budget

Budgeting is an essential element of the financial planning, control, and evaluation processes of governments. For community colleges, the budget is an educational plan expressed in dollars. Approximately half of our fiscal resources come from state funds; local property taxes give us between one-quarter and one-third of our dollars. The remaining revenues are derived from student fees, other local services, and the federal government.

OFFICE OF THE SUPERINTENDENT/PRESIDENT

MEMORANDUM

TO: Board of Trustees
FROM: Richard Giese
SUBJECT: 2001-2002 Tentative Budget Message
DATE: June 28, 2001

The economic growth in the state of California slowed during fiscal year 2000-2001 due to volatility in the financial markets, the energy shortage, increased cost of fuel and rising unemployment. Collectively these issues have had direct impact on projected state revenues for fiscal year 2001-2002. Although education and the California Community Colleges remains a priority in the Governor's budget, the uncertainty in system-wide funding reinforces the need for conservative tentative budget recommendations.

The 2001-2002 Tentative Budget recommended for adoption is balanced and reflects projected increases in expenditures for energy, insurance and modest inflation. A general fund contingency of \$300,000 and a Board of Trustees reserve of \$1,500,000 combine for a total reserve and contingency of \$1,800,000. This represents 6.04% of the \$28.3 million general fund. Current plan for the general fund contingency and reserve is 5% for the Adopted Budget in September. An additional \$300,000 reserve has been budgeted in the Capital Outlay fund for property acquisition.

The Tentative Budget is based on a conservative FTES base of 6,450 and an additional 171 FTES of funded growth for a combined revenue limit of 6,621 FTES. The budget target will be 6,700 FTES. A 3.87% COLA has been included in the budget. Increased funding for growth and Partnership for Excellence have not been included.

The 2001-2002 Adopted Budget will be recommended for adoption in September when the ending balance will be determined and a state budget will be available.
